Experience

Senior Software Engineer in Research, RTX BBN Technologies, April 2022 — Present

Stack: HTML, CSS, React, Vue, Javascript, Typescript, CesiumJS, Tailwind, Vite, Node.js, Java, Python

- Architected front-end systems across multiple defense programs, consistently delivering ahead of schedule
- Prototyped interface concepts directly from customer discovery sessions, compressing the gap between requirements and working software
- Applied HCI principles to redesign a legacy program's design system, improving operator workflow efficiency and reducing cognitive load
- Delivered command and control geospatial features enabling real-time mission awareness for operational customers, directly improving task completion in the field
- Led multi-discipline teams in delivering mission-critical solutions meeting stringent security and compliance requirements across programs
- Participated in business development and proposal efforts to win new work and grow the program portfolio
- Served as UI/UX subject matter expert across programs, resolving complex interface challenges and authoring front-end standards adopted across a team of 10+ engineers

Senior Software Engineer, Raytheon Technologies, July 2019 — April 2022

Stack: HTML, CSS, Angular, Typescript, CesiumJS, Webpack, Node.js, Java

- Executed front-end and full-stack feature development across defense programs, consistently meeting schedule and program milestones
- Championed TypeScript adoption across the team, establishing patterns that improved code consistency and reduced front-end defects
- Led the redesign and modernization of a standalone training application from concept to delivery — owning design, architecture, and development — reducing operational costs and improving maintainability
- Applied HCI principles to improve operator-facing interfaces based on customer feedback, streamlining productivity and application flow
- Earned designation as front-end subject matter expert and mentored teammates on modern development best practices

Lead Front-end Developer & Designer, MarketSnare, April 2015 — July 2019

Stack: HTML, CSS, React, Angular, Javascript

- Increased PageSpeed scores by up to 20% across client websites by migrating legacy programs to a modernized front-end architecture, directly improving user retention and client satisfaction
- Architected a componentized and modular codebase that became the standard build approach across MarketSnare programs, measurably decreasing deployment times
- Implemented WCAG 2.0/2.1 and ADA compliance across programs and client websites while preserving brand integrity
- Adopted Schema.org definitions via JSON-LD and RDFa site-wide, generating measurable increases in organic SEO conversions for clients

Front-end Developer, Sweetwater Sound, April 2014 — April 2015

Web Specialist, Cirrus ABS, May 2012 — April 2014

Education

Masters of Science in Human-Computer Interaction, Indiana University Indianapolis (formerly IUPUI), August 2021 — May 2023

Bachelor of Science in Informatics, Trine University, Angola, Indiana, August 2008 — May 2012

Technical Skills

- **Frontend:** React, Vue, Angular, TypeScript, JavaScript (ES6+), SolidJS, HTML5, CSS3/SCSS, Tailwind, Vite
- **Backend:** Node.js, MongoDB, RESTful APIs, Docker, Java, Python
- **Visualization:** CesiumJS, Three.js, D3.js, Highcharts, Mapbox
- **Design & UX:** Figma, Adobe Creative Cloud, design systems, HCI methods, usability testing
- **Standards:** WCAG 2.0/2.1, Section 508 & ADA Compliance, Schema.org, JSON-LD, RDFa
- **Tooling:** VS Code, IntelliJ IDEA, Git, GitHub, GitLab, Bash, Windows, macOS, Linux

Professional

- Agile/Scrum (CSM certified)
- Cesium Certified Developer
- Active U.S. Security Clearance
- Technical mentorship & leadership
- Human factors research & discovery
- Business development & proposal support
